

Make Your Own Vertical Piano!

Paper folding tips - Make good creases. Use heavy paper like cardstock. Carefully match edges and corners.

Instructions for creating your vertical piano:

1. Fold a square piece of paper in half, then in half again. Open the paper back to the rectangle shape with the open side down. Fold each side in to meet in the middle, then open back to the rectangle shape.
2. Fold each top corner down into a triangle shape. Fold to the front and then to the back. Swing one side of the paper out, opening the flap with your finger and folding it down to make a shape like the roof on a house. Repeat for the other side.
3. Fold the rectangular flap in the middle up from the bottom to meet the top edge. Fold half the flap down to make the piano keyboard.
4. Fold each side in half, then in at a right angle to make the sides of the piano. Fold the keyboard down. Cut out the keyboard out and glue to your piano.

Make your own vertical (upright) piano.

Start with a square piece of paper.

Fold in half.

Fold in half.

Unfold.

Fold to the center.

Place your finger inside to open.

Continue opening the model.

Open the right side.

Open.
