

I am going to play the piano because...

...it is cool to watch my piano being tuned.

For Parents: A piano technician makes your piano sound better by turning the tuning pins to tighten or loosen the strings. A regularly tuned piano is critical for the development of your child's ear training. The technician will also check your piano to make sure all the parts are working together correctly and will be happy to show your child the parts inside the piano and how they work.

Contact the Piano Technicians Guild to order an 8-page coloring book for children with parent notes and information about the benefits of learning to play the piano.

I am going to play the piano because...

...it will help me feel good about myself.

For Parents: When you learn to play the piano, it gives you a sense of pride and achievement. Whether playing for family and friends or for personal enjoyment, the joy of playing the piano lasts a lifetime. Ask your child why he or she thinks the little girl in the picture is happy.
